

INTEGRASPEC[®]

"The User Friendly ICF"

FEATURE PROJECT

Side View of
Rounded Walls

Project: Melburn Residence

Kingston, Ontario

Distributor: IntegraSpec Kingston Inc.

Kingston, Ontario

Designer: Peter's Studio

Kingston, Ontario

Features: 6" IntegraSpec Wallsystem foundation with 10' backfill and 9' main floor walls.

Benefits: *This waterfront custom home is located on Lake Ontario. Along with the beautiful view come high winds. IntegraSpec eliminates the drafts and noise associated with waterfront living. Another reason the homeowners chose IntegraSpec[®], was the excellent surface for their exterior stucco finish. The combination of steel reinforced concrete provides a movement-free substrate, that does not warp or twist and since IntegraSpec includes an exterior layer of expanded polystyrene, stucco costs were reduced compared to conventional construction methods and the contractor provided an extended warranty.*

IntegraSpec – the best choice for this Mediterranean Style home.
